Dear {FIRST_NAME|Valued Customer},

High Density Multimedia Chassis (HDMC) provides connection versatility in Commercial Customer Premises Applications

Maximize network infrastructure efficiency with the new HDMC from All Systems Broadband. This innovative product provides a flexible, scalable, and highly configurable platform to deliver a variety of business services in many different commercial environments.

HDMC helps future-proof the network by bringing multimedia connections together in a single chassis with port density that easily scales as the subscriber base grows.

Built in the USA, the HDMC chassis is constructed of lightweight powder-coated aluminum and the design includes integrated cable management and multiple

ground locations. Through the use of easily interchangeable panels with industry standard LGX® dimensions, the chassis can handle fiber and copper connections including LC, SC, RJ45 and F81. The HDMC also supports the increasingly popular Multi-fiber Push On (MPO) type connectors.

The flexibility of the HDMC also extends to mounting options. The chassis is designed to work in both wall-mount and 19" or 23" rack-mount environments. It can be placed in a vertical or horizontal orientation when used on a wall, allowing use in crowded telecom closets or similar environments. The chassis provides generous cable management on both front and back sides, facilitating installation of new services and rearrangements as needed.

Check out the new HDMC to learn more about how it can improve your company's efficiency in delivering commercial services!

Not sure how SDN affects Outside Plant?

CTO Mike Grice will be presenting "*Connecting the Physical Layer for Successful SDN Deployments*" at this year's OSP Expo in Denver. If your plans include OSP Expo, mark your calendar for **Wednesday, Sept 2, 2015 at 8:00am** to attend this insightful seminar. If you are unable to attend, but would like to receive information, drop us a note using the "Contact Us" link to the left and we will be sure to follow up!
