## ALL SYSTEMS BROADBAND eNEWS

Keeping you Connected

Dear {FIRST\_NAME|Valued Customer},

Spring is in full swing, which means those projects that were waiting out the winter cold are now moving at light speed. All Systems Broadband is prepared to help you meet those critical deadlines and seize new revenue opportunities! Watch these **eNEWS** letters for more information.

### Featured Product - FIBER JUMPERS - FAST!!!

All Systems Broadband can now ship custom Fiber Optic Patch Cords within 48 hours of receipt of an order. This **RAPID RESPONSE** service can help keep your project on track when proper length jumpers are needed to make that final connection. These USA-made jumpers are available in custom lengths and with a variety of connectors. Full details may be found by [clicking here](#).

### Customize your Glow!

We have written about the ConnectAssure™ HDMI Cable before. The main benefit of this product is that it allows your subscribers to visually identify whether their set top box (or other device) is properly connected to their HDTV.

Recently a customer asked, "Can we customize this cable with our own branding?" Our response - **Why not!** Now you can not only save money on truck rolls by having customers troubleshoot for disconnected cables themselves, you can also promote your business with your own branding steadily glowing in your customer's home or business!

[Contact us](#) for more information and details.

We plan to use occasional **eNEWS** letters to keep you abreast of new ideas in the world of Broadband Connectivity. As always, your ideas and input are highly valued. Please don't hesitate to [give us a call or drop us a note](#) if you feel that we can help you in reaching your 2011 goals.

We look forward to working with you!

Sincerely,

## All Systems Broadband
